Attention: Mr. John F. Stolz, Chief  
Operating Reactors Branch No. 4

Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

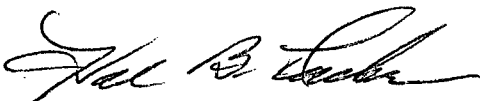

By letter dated April 1, 1985, the NRC noted that, for some situations, the number of nuclear equipment operators required by Technical Specification Table 6.1-1 is less than the number specified in NUREG-0737, Item I.A.1.3. The NRC requested that Duke propose changes to the Technical Specifications to incorporate the correct number of nuclear equipment operators.

Pursuant to 10 CFR 50 §50.90, please find attached (Attachment 1) a proposed amendment to the Oconee Facility Operating License and revisions to the Oconee Nuclear Station Technical Specifications. The proposed amendment would revise Technical Specification Table 6.1-1 to reflect the correct number of nuclear equipment operators as required by NUREG-0737, Item I.A.1.3.

Please note that the proposed amendment is a change that constitutes an additional limitation in conformance to changes in the regulations. Duke has determined that the proposed amendment warrants a No Significant Hazards Consideration (Attachment 2). A copy of this application is also forwarded to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the staff.

Pursuant to 10 CFR 170.21, please find enclosed a check in the amount of \$150.00 for the application fee.

Very truly yours,

Hal B. Tucker
