Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

Pursuant to 10 CFR 50, §50.90, please find attached (Attachment 1) a proposed amendment to the Oconee Facility Operating License and revision to the Oconee Nuclear Station Technical Specifications. The requested revisions are administrative in nature and are, therefore, of no significance with respect to the health and safety of the public.

The proposal contains changes to correct typographical errors; correct an error in the Table of Contents; update Final Safety Analysis Report (FSAR) figures and tables being referenced; correct the title of the Station Health Physicist; up-date the Station Organization Chart and Management Organization Chart; delete out-of-date footnotes; delete an unnecessary section; and provide clarification through different wording. The supporting technical justification is provided in Attachment 3.

Please note that due to the revision made on page 3.7-3, Section 3.7.3(f) had to be relocated to page 3.7-4. The actual context has not changed; only its relative location within Oconee's Technical Specification has changed.

Please find attached (Attachment 2) the No Significant Hazards Consideration evaluation. Duke has determined that the proposed amendments warrant a No Significant Hazards Consideration, since Administrative changes are involved. Duke is forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the Staff.

Pursuant to 10 CFR 170, §170.12, please find enclosed a check in the amount of \$150.00 for application fee.

Very truly yours,

Hal B. Tucker
