Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287

Dear Sir:

Pursuant to 10 CFR 50, §50.90, please find attached (Attachment 1) a proposed amendment to the Oconee Facility Operating License and revision to the Oconee Nuclear Station Technical Specifications.

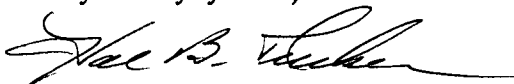

The proposed amendment request concerns the deletion of Technical Specification 3.9.4 "Chemical Treatment Ponds (CTP 1 and 2)" Part C. Duke Power Company (Duke) believes that this specification is outmoded and unnecessary. In addition, Duke's McGuire and Catawba Nuclear Stations do not have this restriction in their Technical Specifications; therefore, its deletion will more closely conform to the NRC's desire for standardized Technical Specifications per NUREG 0472.

Please note that due to the revision made on page 3.9-3, Sections 3.9.5 (c) and 3.9.6 were relocated to page 3.9-3. The actual context has not changed; only its relative location within Oconee's Technical Specification has changed.

Attachment 3 provides the Technical Justification for the proposed amendment. In addition, as required by 10 CFR 50.91, Duke has performed a No Significant Hazards Consideration evaluation (Attachment 2) in accordance with the standards in 50.92. This analysis has determined that the proposed amendment request does represent a No Significant Hazard Consideration. Duke is forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the NRC staff.

Pursuant to 10 CFR 170, §170.12, please find enclosed a check in the amount of \$150.00 for application fee.

Very truly yours,

Hal B. Tucker
