Subject: Oconee Nuclear Station  
Docket Nos. 50-269, -270, -287  
Technical Specification Amendment  
Request for the Radioactive Waste  
Volume Reduction Incinerator  
(Supplement 1)

Dear Mr. Denton:

By letter dated August 27, 1986, Duke Power Company (Duke) submitted a proposed license amendment for the Oconee Nuclear Station (ONS) Facility Operating Licenses and Technical Specifications. The changes were to include additional operability requirements for monitors and surveillance items required by the addition of the Radwaste Facility at ONS. Subsequent review has indicated that additional technical specification changes are necessary, therefore resulting in this supplement to the amendment request.

Pursuant to 10 CFR 50, §50.90, please find attached a supplemental proposed amendment to the Oconee Facility Operating License and revisions to the Oconee Technical Specifications (Attachment I). Attachment II contains additional technical justification. Regarding the issue of no significant hazards consideration, an analysis of the proposed amendment, submitted as Attachment 2 with our letter of August 27, 1986, was performed in accordance with the standards contained in §50.92 and remains valid with respect to the attached supplemental proposed amendments. By copy of this letter, Duke has forwarded this supplemental application to the South Carolina Department of Health and Environmental Control.

Page Two

Since this submittal consists of a supplement to a previously submitted amendment request, as yet unapproved, Duke considers no additional license fees are justified.

Please feel free to contact us if additional information is required.

Very truly yours,

Hal B. Tucker
