Docket Nos. 50-269, -270, -287  
Technical Specification Amendment

Dear Sir:

By letter dated November 19, 1985, Duke Power Company (Duke) submitted a proposed amendment to the Oconee Nuclear Station Facility Operating License and revisions to the Technical Specifications. The proposed Amendment would allow use of the TN-8/TN-8L multielement spent fuel cask in the Oconee Unit 3 Spent Fuel Pool. During a conference call concerning this amendment, the NRC Staff requested additional information regarding the transportation of Oconee spent fuel to the McGuire Nuclear Station via the TN-8/TN-8L cask. The subsequent paragraph provides the requested information.

There has been 44 shipments from Oconee's Units 1 and 2 spent fuel pool to the McGuire spent fuel pools using the TN-8/TN-8L cask. Out of the 44 shipments, there has been 4 unplanned stops with a maximum duration of seven minutes for one of the stops, the other three stops have been for 5 minutes or less. By a letter dated June 17, 1986, the NRC/NMSS indicated that Duke was registered, in accordance with the provisions of 10 CFR 71.12, as a user of the Transnuclear, Inc. Model Nos. TN-8 and TN-8L packaging (package identification no. USA/9015/B( )F. As a registered user, Duke will abide by the provisions of the certificate of compliance for the cask and the applicable regulatory requirements.

Very truly yours,

Hal B. Tucker
