Subject: Oconee Nuclear Station  
Docket Nos. 50-269, ~~2~~70, ~~2~~87

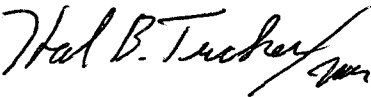

Gentlemen:

By letters dated March 9, 1987, May 15, 1987 and June 30, 1987 Duke Power Company (Duke) provided initial response to the NRC letter dated January 23, 1987 concerning alternative technical specifications for the Oconee Standby Shutdown Facility (SSF). Duke's letter of June 30, 1987 indicated that new proposed technical specifications for SSF with appropriate justification will be submitted by August 15, 1987. Accordingly, please find attached alternative technical specifications for the Oconee SSF.

The attached technical specifications (Attachment 1) are intended to replace the affected pages in Duke's original amendment request dated July 26, 1985. The unaffected parts of the original submittal including the No Significant Hazards Evaluation remain valid. Attachment 2 provides justification and a discussion of the proposed technical specifications.

Inasmuch as the attached proposed changes are a supplement to a previous technical specification amendment request as submitted by Duke letter of July 26, 1985, no application fees are required.

Very truly yours,

Hal B. Tucker
