Subject: **Oconee Nuclear Station**
Docket Nos. 50-269, -270, -287
Auxiliary Electrical Systems
Proposed Technical Specifications

Gentlemen:

Pursuant to 10CFR50, Part 50.90, please find attached (Attachment 1) a proposed amendment to the Oconee Nuclear Station (ONS) facility operating licenses and revisions to the ONS Technical Specifications. As detailed in Licensee Event Report (LER) 269/87-09 changes to Specification 3.7 are necessary in order to resolve apparent conflicts regarding operability of Emergency Power Switching Logic (EPSL) functional units. In addition, the following changes have been included within this amendment request:

- o Operability requirements for 125VDC instrumentation and control batteries have been updated;
- o Operability requirements for Keowee auxiliary transformers are included;
- o The Bases have been revised to reflect changes to Specification 3.7.

I have determined the attached proposed amendment as having no significant hazards considerations. Attachment 3 provides the No Significant Hazards Consideration Evaluation. Attachment 2 provides the supporting Technical Justification.

I am forwarding a copy of this application to the South Carolina Department of Health and Environmental Control for review and, as appropriate, subsequent consultation with the staff.

Very truly yours,

Hal B. Tucker

Hal B. Tucker, being duly sworn, states that he is Vice President of Duke Power Company, that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this revision to the Oconee Nuclear Station License Nos. DPR-38, DPR-47, and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

Hal B. Tucker, Vice President

Subscribed and sworn to before me this 12th day of May, 1989.
