Attention: Document Control Desk
Washington, DC 20555

Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Appendix J Testing Penetration Number 53
Proposed Technical Specification Amendment

By a letter dated September 29, 1989 a proposed Technical Specification was submitted for NRC approval on an emergency basis. The proposed revision consisted of changes to table 4.4-1, list of penetrations with 10CFR50, Appendix J test requirements. The reason for the amendment was due to the discovery that penetration number 53 had not been properly tested during a type A test. Please find attached a revised page 4.4-13. The revised page provided by this letter supersedes the one provided by Mr. W. H. Owen's September 29, 1989 letter.

Please feel free to call on members of my staff if you have any additional questions or concerns regarding this issue.

Very truly yours;

H. B. Tucker
