

September 21, 2015

Mr. Kevin Tuite
President and Chief Executive Officer
WMG, Inc.
16 Bank Street
Peekskill, NY 10566

SUBJECT: DISCONTINUATION OF THE REVIEW OF THE MODEL NO. WMG-150B
PACKAGE

Dear Mr. Tuite:

On January 2, 2015, WMG, Inc., submitted an application for approval of the Model No. WMG-150B package as a Type B(U)-96 package. On April 29, 2015, you responded to our request for supplemental information dated March 17, 2015.

By letter dated September 15, 2015, you requested an extension up to January 31, 2016, to respond to our request for additional information (RAI) letter dated August 26, 2015. The RAIs identify significant unresolved technical issues. Because of the breadth of these concerns, you identified, in your extension request, the need to perform additional analyses and materials testing. The staff anticipates significant changes to your application to resolve the RAIs, as the application does not currently contain sufficient technical information in scope and depth to allow the staff to complete the detailed technical review. Discontinuation of the review will allow you to complete the analyses and testing at your convenience and prepare a revised application without schedule pressure.

NRC staff has decided to terminate its review because of the extensive nature of the information needed. No further NRC work will be performed and TAC L24977 will be closed. This does not preclude or limit your resubmittal of this application. A complete revision, including all of the technical information identified in the RAI, should be included in your future application submittal. The staff will be available for a public pre-application meeting, if requested, before you submit the revised application.

If you have any questions regarding this matter, I may be contacted at (301) 415-7505.

Sincerely,

/RA/
