**Subject:** RE: RE: Question: Reactor Watch - NRC Exempt Distribution License

Mr. Lipsett,

I contacted Ms. Bray because we have a question regarding Reactor Watch products distributed under NRC exempt distribution license no. 04-35122-01E. Ms. Bray informed us that you are the point of contact for Reactor Watch. Please read our email request below.

If you have any questions please let me know.

Thank you.

**Subject:** [External\_Sender] RE: Question: Reactor Watch - NRC Exempt Distribution License

Dear Hector, it's nice to hear from you again. Unfortunately I think there may be some confusion. I do not work for Reactor Watch and I am not an authorized representative for them at this time. The contact for that license is Scott Lipsett and I have included him on the email in case you didn't have his contact information.

OSI, the company I work for acted in a consulting role and helped Reactor Watch apply for their initial license to import and distribute the watches. We based the application on the specific information provided by Reactor Watch including drawings and watch models to be included. We have not performed any work for that company since the time of the application. I have no information on what models or changes they have made since that time.

If I can be of any further assistance please let me know, otherwise please contact Scott for additional clarification. The last phone number I had for him was (818) 597-2900 ext 202.

**Subject:** Question: Reactor Watch - NRC Exempt Distribution License

Ms. Bray,

The U.S. Nuclear Regulatory Commission (NRC) is doing random checks on exempt distribution licenses and we have reviewed the Reactor Watch exempt distribution license no. 04-35122-01E and associated file. In an email dated March 24, 2014 (Agencywide Documents Access and Management Systems (ADAMS) accession no. ML14084A300), you provided the Reactor Watch model numbers that are distributed under the NRC exempt distribution license:

T-6040-1  
T-6041-1  
T-6042-1  
T 6043-1  
T 6045-1  
T 6261-1  
T 6082-1

In your letter dated June 9, 2014 (ADAMS accession no. ML14169A296), you provided a diagram (attached) with three different watch dials. These watches models are Watch Model1, Watch Model 2 and Watch Model 3.

The NRC searched your website ([www.reactorwatch.com](http://www.reactorwatch.com)) and reviewed the Never Dark Technology watches, which contain Tritium. The website includes the following seven type of watches:

Poseidon Ti  
Poseidon SS LE  
Gamma Ti  
Titan  
Gyphon  
Trident  
Atom ND

It is our practice to have the most complete and accurate information regarding an NRC license authorization. Please clarify the relationship between the model numbers provided in the email dated March 24, 2014, the watch names in the Reactor Watch website and the Watch Model 1, Watch Model 2 and Watch Model 3 diagrams. Please submit the requested information by COB Tuesday October 6, 2015.

Please be aware that upon your request, proprietary information submitted to the NRC may be withheld from public disclosure. To do this, you must follow the procedures in 10 CFR 2.390(b) including requesting withholding at the time the information is submitted and complying with the document marking and affidavit requirements set forth in 10 CFR 2.390 (b)(1).

In accordance with 10 CFR 2.390 a copy of this letter will be available electronically for public inspection in NRC's Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

If you have any questions please let me know.

Best regards,

***Hector Luis Rodríguez-Luccioni, Ph.D.***
