SUBJECT: MOHAMED SHARAWY, REQUEST FOR ADDITIONAL INFORMATION CONCERNING APPLICATION FOR MATERIALS LICENSE, CONTROL NO. 588579

Dear Mr. Sharawy:

This is in reference to your application dated August 13, 2015, requesting a Nuclear Regulatory Commission License. As we discussed with you via telephone on November 12, 2015, and December 17, 2015, your application did not include all of the information we need to complete our review. In order to continue our review, we need the following additional information:

1. Item 5 of your application states that the material will be used to measure the physical properties of material. This statement does not provide sufficient detail regarding the purpose for your possession of a portable gauge. Please provide a detailed description your proposed uses of the portable gauges. The description should include: the types of materials that you plan to test, the properties that you will be testing, and the types of environments in which testing will occur.
2. Item 7 of your application states that you "Worked as Quality Assurance Specialist at the NYC Department of Design and Construction. Work duties included record keeping and radiological safety of nuclear gauge." Please provide evidence showing that you have actual hands-on experience in the use of portable moisture-density gauges for the purpose requested.
3. In accordance with the requirements of the Department of Transportation in 49 CFR 172.704 "Training requirements," refresher training is required every three years. The training certificate you provided as part of your application was dated December 3, 2001. Prior to performing any Hazardous Materials shipping responsibilities with the requested material (portable gauge), you will need to complete refresher training in accordance with 49 CFR 172.704. Please submit evidence of current training for Hazardous Materials shipping.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 588579. **You may respond via e-mail with a written, signed and scanned document in pdf format if you find it more convenient.** You may also respond via facsimile to 610-337-5269, or via U.S. Mail to Division of Nuclear Materials Safety, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5136.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

Thank you for your cooperation.

Sincerely,
Scott Wilson
