Re: Oconee Units 1, 2, & 3  
Docket Nos. 50-269, -270, and -287

Dear Dr. Morris:

Duke Power Company is filing herewith Amendment No. 31 to its Application for Licenses for the Oconee Nuclear Station, which is under construction pursuant to provisional construction permits CPPR-33, -34, and -35 issued by the Commission on November 6, 1967. This filing includes three (3) signed original copies of the Amendment with attachments and seventy (70) copies of Revision No. 19 to the Oconee Final Safety Analysis Report, which was filed as Amendment No. 7 on June 2, 1969.

The Amendment is in a format designed to keep current the application and the Final Safety Analysis Report. Please insert the revised material in the seventy-three (73) copies of the Final Safety Analysis Report (Serial Nos. 1-73), as per the attached tabulation identified as FSAR Revision No. 19.

The purpose of Amendment No. 31 is to provide additional information describing minimum net positive suction head for low pressure injection and reactor building spray pumps, incorporate minor design changes reflected in the construction of Unit 1, and revise the Technical Specifications for Unit 1.

Sincerely,

*A.C. Thies*
