Re: Oconee Nuclear Station
Docket Nos. 50-269, 50-270, 50-287

Dear Mr. Giambusso:

Section 4, Surveillance Requirements, of the Oconee Nuclear Station Technical Specifications requires that certain surveillance of structures, systems and components be performed at specified frequencies, e.g., weekly, monthly, annually, etc. Associated with the various frequencies specified are maximum allowable intervals between successive surveillances.

With regard to the initial performance of such surveillance items for which a frequency is specified, it is Duke Power Company's position that the beginning date for the interval specified in the Technical Specifications is the date of issuance of the Facility Operating License for a unit. For example, a surveillance specified to be performed annually for a particular unit could be performed in accordance with the Technical Specifications, up to eighteen (18) months following issuance of the Facility Operating License for that unit.

If we have not heard from you within 30 days, we shall assume that the above application of Oconee Technical Specifications is correct.

Very truly yours,

A. C. Thies
