Reference is made to your letter of December 13, 1973, requesting changes in Appendix B to the Technical Specifications for the Oconee Nuclear Station. With respect to the proposed change in location for measuring the pH of effluent from the waste water collection basin, we will need the following additional information to complete our evaluation:

1. Discuss provisions for temporarily retaining the combined effluent from the waste collection basin and the site drainage for monitoring prior to release to the Roanoke River.
2. Discuss what consideration is being given to enlarging the waste collection basin, improving mixing and circulation in the basin or constructing an additional retention basin on site.

Sincerely,

Original signed by  
Gordon K. Dicker

Gordon K. Dicker, Chief  
Environmental Projects Branch 2  
Directorate of Licensing
