Re: U.S. Nuclear Regulatory Commission
Materials
License No. 21-23396-02

United States Nuclear Regulatory Commission
Region 3
2443 Warrenville Road Suite 210
Lisle, Illinois, 60532-4352

To Whom It May Concern:

Moore & Bruggink, Incorporated, wishes to request an amendment to our current materials license (License No. 22-23396-02). The current radiation safety officer, Mr. Roy J. Laisure, will be retiring near the end of June or early July 2016.

It is requested that Mr. Scott Knapp of Moore & Bruggink, be allowed to assume the position of RSO as soon as possible.

Mr. Knapp has been employed by Moore & Bruggink as a field and office technician since April 1993. Prior to his employment at Moore & Bruggink, Mr. Knapp worked as a field technician for the Michigan Department of Transportation. Mr. Knapp has a thorough knowledge of all of the required radiological safety practices associated with the use of portable nuclear density gauges.

In 1993, Mr. Knapp successfully completed Troxler Electronics' training course for the safe usage of nuclear density testing equipment. In addition to the initial training for safe gauge usage and hazmat re-certifications, Mr. Knapp has also completed a Radiation Safety Officer training course through the American Portable Nuclear Gauge Association.

In recent years, Mr. Knapp has also gained additional knowledge related to the role of an RSO by observing the routine "gauge" maintenance and safety procedures associated with that position.

Sincerely,

A handwritten signature in cursive script, reading 'Roy J. Laisure', written in dark ink.

Roy J. Laisure
Radiation Safety Officer
