Dr. Dennis C. Bley, Chairman  
Advisory Committee on Reactor Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

SUBJECT: DRAFT FINAL RULE TITLE 10 OF THE CODE OF FEDERAL REGULATIONS  
SECTION 50.46c, "EMERGENCY CORE COOLING SYSTEM PERFORMANCE  
DURING LOSS-OF-COOLANT ACCIDENTS (LOCA)" AND ASSOCIATED  
REGULATORY GUIDES

Dear Dr. Bley:

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I am writing to thank you for your letter dated February 23, 2016, which provided the NRC staff with the Advisory Committee on Reactor Safeguards' (ACRS) perspectives and recommendations regarding the draft final rule on "Performance-Based Emergency Core Cooling System Requirements and Related Fuel Cladding Acceptance Criteria" and associated regulatory guides. The NRC staff agrees with your recommendation to issue the draft final rule and the three fuel-related regulatory guides. The staff also agrees with your recommendation not to issue Regulatory Guide 1.229, "Risk-Informed Approach for Addressing the Effects Of Debris on Post Accident Long-Term Core Cooling" until the ACRS review has been completed. We appreciate your comments and look forward to continued interactions with the ACRS as we implement this final rule.

Sincerely,

**/RA/**

Victor M. McCree
