

NOV 18 1982

MEMORANDUM FOR: John A. Olshinski, Director
Division of Engineering and
Technical Programs, Region II

FROM: Darrell G. Eisenhut, Director
Division of Licensing, NRR

SUBJECT: PROPOSED GUIDANCE FOR CALIBRATION AND SURVEILLANCE
REQUIREMENTS FOR EQUIPMENT PROVIDED TO MEET ITEM II.F.1,
ENCLOSURES 1, 2, AND 3, NUREG-0737

Reference: Memorandum from John A. Olshinski to D. G. Eisenhut,
dated September 17, 1982

This is in response to your memorandum, referenced above, which advised that the subject guidance was reviewed by your staff and found that it provides needed clarification. You further advise that calibration and surveillance guidelines should also be given to licensees. We are in the process of providing guidance to licensees for the development of Technical Specifications for NUREG-0737 Items. Guidance will be provided regarding calibration testing of containment monitors during refueling operations (TABLE II.F.1-3 of NUREG-0737). Regarding your second issue in which you suggest that the Office of Research should develop an appropriate testing methodology, we are of the opinion that the licensees should adopt a testing program which fulfills their plant specific needs.

Thank you for your interest in this subject and review of the subject guidance.

Order signed by
Darrell G. Eisenhut
