**Subject:** RE: Fermi 2 - NRC Issuance of Amendment associated with Surveillance Requirement (SR) 3.5.1.4

Mr. Yale,

The Nuclear Regulatory Commission (NRC) is in the process of approving a license amendment request from DTE Electric Company, for Fermi 2.

The amendment revises Surveillance Requirements (SRs) to verify that the system locations susceptible to gas accumulation are sufficiently filled with water and to provide allowances which permit performance of the verification. The changes address the concerns discussed in NRC Generic Letter (GL) 2008-01, "Managing Gas Accumulation in

Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems” as described in NRC-approved Technical Specifications Task Force (TSTF) – 523, Revision 2, “Generic Letter 2008-01, Managing Gas Accumulation.”

The NRC staff’s proposed no significant hazard consideration determination was published in the Federal Register on January 5, 2016 (81 FR 257).

Please let me know if you have any comments on this action. I can be reached at 301-415-8004.

Thanks,  
Sue
