SUBJECT: SUMMARY OF A PUBLIC MEETING WITH SOUTHERN NUCLEAR
OPERATING COMPANY AND SOUTH CAROLINA ELECTRIC & GAS
ON FEBRUARY 4, 2016

The U.S. Nuclear Regulatory Commission (NRC) staff held a Category 2 public meeting with Southern Nuclear Operating Company (SNC) and South Carolina Electric & Gas (SCE&G) on February 4, 2016. The purpose of the meeting was to discuss issues associated with the safety review of licensing actions for SNC's Vogtle Electric Generating Plant (VEGP), Units 3 and 4, and SCE&G's Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3.

The meeting notice can be found in the Agencywide Documents Access and Management System (ADAMS) under accession number ML16019A063. The meeting notice is also posted on the NRC public website. Enclosures 1 and 2 are the meeting agenda and attendance list for the meeting, respectively. The other documents referenced during the discussion can be found at the ADAMS Accession Numbers given below:

1. Vogtle, Units 3 and 4 License Amendment Request (LAR) 15-020 – ML15320A464
2. Public Meeting Talking Points for LAR 15-020 – ML16033A051

Summary of Meeting:

On February 4, 2016, staff from the NRC conducted a public meeting with representatives from SNC and SCE&G to discuss issues associated with the safety review of licensing actions for SNC's VEGP, Units 3 and 4, and SCE&G's VCSNS, Units 2 and 3. Specifically, the meeting discussed SNC's LAR 15-020 for the use of localized shoring for composite floors and roof in the auxiliary building.

In the discussion, the staff requested additional details about two specific conditions described in the LAR for the use of shoring to provide temporary support for openings used in construction activities, described in the Public Meeting Talking Points handout. Specifically, the staff asked SNC to clarify the construction sequence of how loads will be transferred from the shoring to the support wall. SNC, through their contractor, Westinghouse Electric Company (WEC), provided the explanation, noting that the steel deck spans between beams and supports the weight of the wet concrete. At the beam seats, temporary shoring will be used in instances where the wall is not fully complete due to construction sequence of wall penetrations. When wall construction is completed, there will be no gap between the beam seat and the steel beam. WEC confirmed, noting that the shoring has no impact on the design of the beams or the behavior of the structure. WEC stated that the localized shoring is only used in isolated incidences at the end of a member if the end cannot be placed during normal construction sequences. The staff understood SNC and WEC's response and noted that these additional details should be explained in the LAR to fully describe the extent of using shoring in construction sequences for these conditions. SNC noted that they plan to submit a voluntary supplement to LAR 15-020 to provide these additional details. The staff stated that they still expect to complete the safety review of this LAR to meet SNC's schedule to support concrete placement for the ceilings and floors of the Auxiliary Building.

At the end of the open portion of the meeting, there was an opportunity for the public to provide comments and ask questions. All comments and questions were addressed before ending the meeting.
