(fax) (630)-515-1078

Dear Ms. Tomczak,

This letter is in response to the NRC revised Title 10 letter received on Feb 8, 2016. I am writing to inform you that section 10 of License number 13-26020-01 registered to DePauw University is vague, and thus we need to update it. The new information should include the following statement: "Licensed material shall be used only at the licensee's facilities located within the Julian Science and Math Building, 602 S. College Ave, Greencastle, IN 46135". This building houses the majority of sciences at DePauw, and thus contains all of the radioactivity that is used at our facility. In addition, the Radiation Safety Officer (myself) is also located within this building. This address is the same as the address in Section 2 of the license.

Our original license, number 13-26020-01, contains a site map which shows the location of the Julian Science and Math Building. If you need an additional map or further information, please do not hesitate to contact me either via phone (765-658-4606) or email (droberts@depauw.edu). Thank you very much for all your help with this matter.

David Roberts, Ph.D., R.S.O.

Subject: [External_Sender] response to Revisions to 2015 Fee Rule for DePauw University
Attachments: locationofuserresponse_mar2016_signed

Hello Tammy,

Please find attached to this email the response to Revisions to 2015 Fee Rule for DePauw University. As indicated in the response, DePauw University is a small, liberal arts college. Radiation at our facility is housed exclusively within 1 building, located at 602 S. College Ave. Hopefully this clarifies any questions/concerns that the NRC had. As per conversations that I had with somebody within your office, I think the net result of this will be no fees imposed on DePauw.

Please let me know if you need further information. Thank you very much for all your help on this.

Dave Roberts
