Re: License No. 21-32186-01 Transfer of Control and License Termination

Dear Dr. Shaffer:

In response to your email of March 9, 2016 (see following) the following information is provided:

*Also, in a signed and dated cover letter, please provide a history of all the radionuclides used at the facility, including current copy of leak test results for any sealed sources that were used. Please provide a statement as to where any sealed sources were transferred to, and the license number for the place they were transferred to. If the location had no sealed sources at any time, please make that statement.*

Three sealed sources were used at this facility. Please see attached SEALED SOURCE LEAK TEST. Unsealed Tc-99m sources were clinically used on a routine basis. All of those unsealed sources and waste material have been decayed-in-storage to background levels.

The Three sealed sources were transferred to Mercy Health-St. Vincent Medical Center, 2213 Cherry Street, Toledo, OH 43608 on March 2, 2016. Contact Person: Ann Dollman, Nuclear Medicine Department, 419-251-9070. A copy of their materials license, issued by the Ohio Department of Health, is attached.

A comprehensive area survey and surface area contamination survey was performed on March 3, 2016. That report is also attached. No residual activity was detected.

Please call Dr. Schneider at 419-266-7530 with any technical questions.  
Please call Jennifer Haaser at 419-251-8091 with any administrative questions.

Thank you,

Todd Warner

## CERTIFICATE OF DISPOSITION OF MATERIALS

Estimated burden per response to comply with this mandatory collection request: 30 minutes. This submitted is used by NRC as part of the basis for its determination that the facility is released for unrestricted use. Send comments regarding burden estimate to the FOIA, Privacy, and Information Collections Branch (7-5 FS3), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to [Infocoll@nrc.gov](mailto:Infocoll@nrc.gov), Resource@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NE08-10202, (3150-0028), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Dear Radiation Safety Officer:

Enclosed is Amendment 45, the renewal to your State of Ohio Radioactive Materials License No. 02120490000, in accordance with your license renewal application. Please review the license document to ensure that you understand all of the conditions. If you have any questions or detect any errors, please contact the Bureau of Environmental Health and Radiation Protection (BEH&RP) at (614) 644-2727.

Your license will expire on 01/01/2021. You must conduct your radioactive material program in accordance with your license, representations made in your license application and the Ohio Administrative Code. In particular, you must:

1. Notify the BEH&RP in writing, within the appropriate time frames, when:
  - a. An authorized user or Radiation Safety Officer discontinues duties under the license or has a name change;
  - b. The licensee's mailing address changes;
  - c. You decide to terminate all activities involving radioactive materials authorized under your license; or
  - d. If you decide not to possess or use the authorized radioactive material.
2. Request to obtain a license amendment before you:
  - a. Receive or use radioactive material not authorized on your license;
  - b. Change Radiation Safety Officer;
  - c. Order radioactive material of a different form or in excess of the amount authorized on your license;
  - d. Add or change areas of use, which involve the use of radioactive materials requiring a written directive;
  - e. Add or change areas or addresses of use identified in the license application or on the license;
  - f. Change ownership of the organization; or
  - g. Permit anyone to work as an authorized user who is not listed on your license.
3. Submit a complete license Renewal Application at least 90 days before the expiration date of your license (180 days for broad-scope licenses).

The BEH&RP will periodically inspect your operations involving licensed materials. Failure to conduct your radioactive material program in accordance with State of Ohio regulations, license conditions and representations made in your license application may result in enforcement actions against you.

The Ohio Department of Health (ODH) has recently adopted a new Safety Culture Policy Statement. While this policy statement is not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture for regulated programs using radioactive materials and/or radiation-generating equipment in Ohio. You may access the policy statement on the BEH&RP home page of the ODH web-site at: <http://www.odh.ohio.gov/odhprograms/rp/radprot/radppub1.aspx>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture within your organization.

Sincerely,

  
Stephen James  
BEH&RP Supervisor
