I found the proposal to expand a uranium mine over archeological sites, especially near water sources to be too ridiculous and dangerous to even consider!! What is wrong with government officials who have no common sense as to the health of the people, environment not to mention historical places of great value that will be ultimately destroyed forever. This proposal must not be approved!! Have we all not seen enough permanent damage done by these mines near our native reservations ? Destruction of drinking water, air pollution, soil contaminants and incurable diseases to those who live in the area? I have!

Marcia Lane  
Mulberry,Fl.
