SUBJECT: R. E. GINNA NUCLEAR POWER PLANT, – NRC BASELINE SECURITY  
INSPECTION REPORT 05000244/2016403

Dear Mr. Hanson:

On March 11, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed a security inspection at your R. E. Ginna Nuclear Power Plant. On March 11, 2016, the NRC inspectors discussed the results of this inspection with Mr. Joseph Pacher, Site Vice President, and other members of your staff. Inspectors documented the results of this inspection in the enclosed inspection report.

NRC inspectors documented one finding of very low security significance (Green) in this report. This finding involved a violation of NRC requirements. The NRC is treating this violation as a non-cited violation (NCV) consistent with Section 2.3.2.a of the Enforcement Policy. If you contest this violation or its significance, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555 0001; with copies to the Regional Administrator, Region I; the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555 0001; and the NRC resident inspector at the Ginna Nuclear Power Plant.

One cross-cutting aspect was assigned to the finding in the area of Human Performance, Training, because Exelon failed to provide training and ensure knowledge transfer to maintain a knowledgeable workforce. (H.9). If you disagree with the cross-cutting aspect assignment in this report, you should provide a response within 30 days of the date of this inspection report, with the basis for your disagreement, to the Regional Administrator, Region I; and the NRC resident inspector at the Ginna Nuclear Power Plant.

Enclosure contains Sensitive Unclassified Non-Safeguards Information. When separated from Enclosure, the transmittal documented is decontrolled.
