Additional Information Requested for License Renewal Application

SUMMARY

During our review of your license renewal application dated September 1, 2015, it appeared that your application had not been completely prepared in accordance with the guidance in NUREG 1556, Vol. 1, Rev. 1, "Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Portable Gauge Licenses, dated November 2001." This could potentially make your license more restrictive.

1. Please review the attached license application checklist and please resubmit your application using the guidance in the checklist.
2. Based on our conversation, you would like to change the radiation safety officer listed on your license. To add this person to your license, please provide their name, training records and a delegation of authority. A sample delegation of authority is attached.
3. Based on our conversation, no radioactive material is being stored at 6973 Walter St, Brown City, Michigan location. To remove this location from your license, please provide the most current leak test results so that we may verify that there have been no leaking sources at that location
