Subject: Interim Report

On December 23, 2015, Homewood Products Corporation (HPC) notified the NRC of a potential Part 21. A Part 21 was submitted to HPC by NTS and pertained to irradiation test services performed by Steris Isomedix Services for HPC motors. HPC had completed an evaluation on January 18, 2016 and submitted this evaluation to all of our clients.

We noted in our evaluation that we had tested to radiation levels greater than required by the clients, with the reduced certifications issued by NTS the impact on qualification should not be affected. We have received verification from our clients (18%) that have validated our evaluation to date with no impact on qualification resulting in a safety issue. We are still getting confirmation from our clients and would request an additional 60 days to issue our closure report.

Regards,
