2. NRC Staff Proposed Generic AP1000 License Conditions dated March 2, 2016 [ML 16062A021]
3. Memorandum From Donald Habib, NRC to John McKirgan, NRC dated March 15, 2016, Summary of a Public Meeting on March 10, 2016 with Duke Energy and Florida Power and Light to Discuss AP1000 Combined License Review Issues [ML 16074A219]

On March 10, 2016, the NRC staff held a public meeting (Reference 1) to support the staff's safety review of Combined License (COL) applications. During that meeting, the NRC staff proposed generic AP1000 license conditions (Reference 2) were discussed, as well as applicant comments on them. The NRC staff responses to the applicant comments are documented in a meeting summary memorandum (Reference 3).

Also during that meeting, FPL agreed to provide a letter regarding its position on the NRC staff proposed license conditions. FPL concurs with the proposed generic AP1000 license conditions identified in Reference 2, as modified in Reference 3, for the Turkey Point Units 6 & 7 COLs. FPL understands, based on Reference 3, that the proposed condition 1-1 in Reference 2 is not a license condition but rather a series of authorizations, and will be treated similar to how they were treated for the V.C. Summer Unit 2 COL.
