SUBJECT: SUMMARY OF MARCH 24, 2016, CLOSED MEETING WITH
NUSCALE POWER, LLC, TO DISCUSS NUSCALE'S HIGHLY-
INTEGRATED PROTECTION SYSTEM PLATFORM DESIGN

In a December 23, 2015, letter, NuScale submitted Topical Report (TR) 1015-18653, "Highly Integrated Protection System Platform (HIPS)," Rev 0. (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15363A114) for the U.S. Nuclear Regulatory Commission (NRC) staff's review.

On March 24, 2016, representatives of the NRC staff and NuScale Power, LLC (NuScale), held a closed meeting at NuScale office located at 11333 Woodglen Ave., Suite 205, Rockville, MD 20852, to discuss key design principles of the NuScale's HIPS platform. NuScale provided a detailed description of the HIPS system and responded to the NRC staff's questions.

After NuScale's presentation on HIPS Platform design, the NRC staff discussed its preliminary assessment of the information contained in the TR and the need for additional information, specifically, staff's outstanding questions related to the regulatory compliance of HIPS platform with the Institute of Electrical and Electronics Engineers 603-1991 standard and conformance to applicable regulatory guidance documents. The NRC staff and NuScale agreed to continue the discussions related to compliance issues on a separate closed meeting, which has now been scheduled for April 20, 2016.

The meeting agenda and the list of meeting attendees are included in Enclosures 1 and 2, respectively. The meeting notice is available in ADAMS under Accession No. ML16068A227. Please direct any inquiries to Omid Tabatabai, at (301) 415-6616, or via email to omid.tabatabai@nrc.gov.
