MEMORANDUM TO: Sheldon Stuchell, Chief
Generic Communications Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

FROM: Alexander Garmoe, Senior Project Manager */ra/*
Generic Communications Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF APRIL 6, 2016, PUBLIC WEBINAR BETWEEN U.S.
NUCLEAR REGULATORY COMMISSION STAFF AND THE PUBLIC TO
DISCUSS PUBLIC COMMENT RESOLUTION FOR A DRAFT
REGULATORY ISSUE SUMMARY ON EMBEDDED DIGITAL DEVICES

On April 6, 2016, a Category 2 public webinar was held between the U.S. Nuclear Regulatory Commission (NRC) and the public. The purpose of the webinar was to discuss how the NRC resolved public comments on a draft Regulatory Issue Summary (RIS) that were previously received during formal public comment periods in advance of issuing the final version of the RIS. The purpose of the RIS is to communicate the existing regulatory requirements and guidance related to the use of embedded digital devices in safety-related systems. The public meeting notice, initially issued on March 25, 2016, was subsequently updated several times to attach related documents, and is available in Agencywide Documents Access Management System (ADAMS) at Accession No. ML16097A183. Presentation material used at the meeting is available in ADAMS at Accession No. ML16096A450.

There were 12 NRC staff representatives and at least 17 members of the public in attendance. A list of attendees is enclosed. The list of attendees only reflects those that confirmed their attendance either during or following the meeting.

The NRC provided an overview of the purpose and limitations of the embedded digital devices RIS. The NRC then discussed how some of the public comments received during two formal public comment periods were resolved. The public was provided with an opportunity to ask questions and provide comments about the RIS and NRC's resolution of public comments.
