Subject: FW: Response from "Contact Us About Electronic Submittals"

Hi Team,

This email came in to MSHD this evening via the NRC website. Please let me know if I need to do anything with this. Thanks.

Subject: Response from "Contact Us About Electronic Submittals"

Below is the result of your feedback form. It was submitted by

Julie Keitges (juliewolves@comcast.net) on Friday, March 18, 2011 at 18:01:06

comments: The Diablo Canyon Reactor in California is near a fault line tht is part of the complex surrounding the Pacific Ocean. The southern hemisphere on both the East and the West sides have had recent severe earthquakes. The northern hemisphere has now had this severe earthquake on the Western side. The fault lines in California are obviously the next to move. Do not renew the licensing for the aged and troubled Diablo Canyon Reactor.
