

Construction Material Testing Group L.L.C.

Attn: Shaffer, Vered

In response to our additional information needed to finalize our license renewal for Construction Materials Testing Group LLC, we were asked for the following and respond as follows:

- 1) Current leak tests for our current gauge inventory: The current leak gauge tests are attached in subsequent pages. (5 gauges in all, but there are 6 pages due to the fact one had the dual source sent on two separate forms)
- 2) Signed and dated delegation of authority: This form is also attached and dated as requested
- 3) Clarification of location: As pertaining to the previous location of 11030 Hickman Mills Drive in Kansas City, MO. We have not been located, nor have we stored any item at this location since 2010. At that time we possessed only two gauges, which are the two 4640Bs #813 and #61830. Those leak tests are included in our current inventory.
- 4) Temporary job site statement: CMTG also would like to maintain the use of temporary sites within the regulations of our license.
- 5) Clarification of qualified user list: We would like to defer our list of users and state that the users will be only ones authorized by the RSO and management of CMTG to alleviate the need to alter/amend the list at an unnecessary frequency, and maintain flexibility within the scope of the license.

Thank you for your attention to this matter and feel free to contact me for anything in the future.

Signed  Date 4-22-16
