Subject: [External_Sender] NRC/UAMPS April 12 Meeting Follow-Up

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Ms. Starefos,

This is a follow up on the April 12 NRC/UAMPS SMR Project meeting.

I had asked about the contribution of financial and other resources of the Department of Energy, including INL, to this project and the legal and regulatory bases for that support.

Probably these are questions for the DOE. Once the Meeting Summary is posted, I will have the names and contact information for all of the meeting participants.

Also, I wonder where UAMPS and the DOE got the bizarre notion that the proposed SMR complex (which is part of a larger nuclear fuel chain) would be "carbon free." But, that would be question for the DOE and UAMPS.

Sincerely,

Sarah Fields
