

# FEMA Hostile Action-Based (HAB) Scenario Update

Darren Bates

FEMA Technological Hazards Division (THD) HQ

**FEMA**

# Common Demonstrated Strengths from HAB After Action Reports

- Demonstrating the ability of Incident Commanders to prioritize mission assignments from multiple agencies and entities such as the utility, emergency management, emergency medical services while maintaining command of tactical operations.

**FEMA**

# Common Demonstrated Strengths from HAB After Action Reports

- Mobilization of response personnel.
- Communication between Incident Command Post (ICP) and Offsite Response Organizations (OROs).
- Implementation of the National Incident Management System (NIMS) and the Incident Command System (ICS) by Incident Commanders.

**FEMA**

# Common Demonstrated Strengths from HAB After Action Reports

- Demonstrating solid direction and control within the ICP by Incident Commanders.
- Demonstrating the knowledge and ability to analyze and use mutual aid resources by Incident Commanders.

**FEMA**

# FEMA Staff Identified Opportunities for Improvement

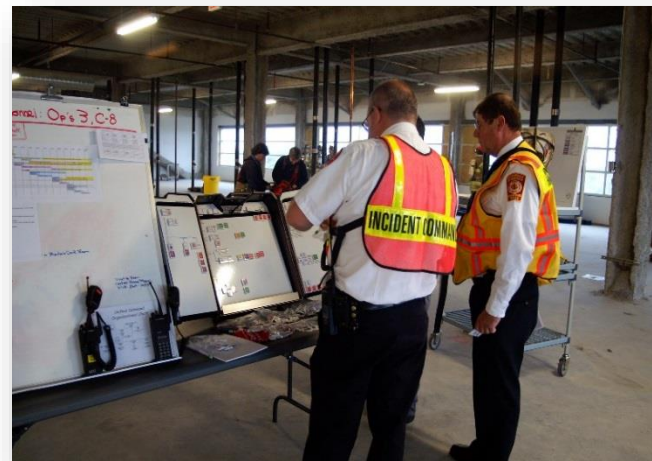

- Maintain the operational pace and frequency of training and drills with ICPs.
- Integrate training for multiple first responder agencies, including the use of just-in-time training modules.

**FEMA**

# FEMA Staff Identified Opportunities for Improvement

- Coordination of Protective Active Decisions (PADs) in order to keep the ICP and Emergency Operations Center (EOC) apprised of actions already taken.
- ICP Communications and Coordination with EOC and Utility Liaisons.

FEMA

# Moving Forward

- FEMA REP will continue to support HAB planning workshops, meetings, activities, evaluations, and trainings.
- Prepared for the next HAB cycle, which will have a radioactive plume in conjunction with a hostile action at the nuclear power plants (NPPs).

**FEMA**
