Larry,

If CBR requires any further clarification of the open issue requests discussed in the April 6, 2016 public meeting, please do not hesitate to contact me via a PM to PM phone call.

Additionally, during the April 6, 2016 public meeting, you asked whether Crow Butte Resources, Inc. (CBR) can expect to receive additional requests for information (RAI) from staff's technical review of health physics-related RAI responses provided in the Revised Marsland Technical Report. Please note that since the time of staff's acceptance of CBR's Heath Physics RAI responses on March 10, 2016, staff has been working to complete the health physics-related sections of the Marsland safety evaluation report. If any questions should arise as staff completes those sections, I will submit them to you promptly.

Regards,

Tom Lancaster
