Subject: [External_Sender] Mining minerals

Please consider the impact to our Mother Earth and our sacred sites due to uranium and other mineral mining in and around these areas in and around Devils tower known to us as Mato Tipila and the Bear Lodge Mountains close to Sundance Wyoming.

Compromising our aquifer is a major concern. Water is sacred to us also. We have had a major oil spill due to a leak in a Canadian oil pipeline in Eastern South Dakota which is under scrutiny because of possible contamination of land, the aquifer and the Missouri watersheds. Supposedly the pipeline was being monitored by the Canadian company. We have been told the leak was discovered by the farmer who owned the land.

These are the reasons for our concerns. How are they cleaning up the spill. Who is monitoring the clean up of the spill? How are we to believe they will get it cleaned up safely?

Now you want to let hem digup more minerals close to watersheds and sacred sites. Please say no to any more mining.
