Dear Mr. Yin,

Please accept this email as a formal request for a withdrawal of the amendment we submitted for the technical specifications of our AGN-201 reactor at Idaho State University. As we discussed in March via phone and email, there has been significant re-organization at our university such that the amendment itself requires significant updating. Therefore, per your suggestion, we will withdraw the amendment and submit a new one containing the most accurate information.

I will phone to confirm your receipt of this email and to answer any questions that you may have.

Thank you
