Good morning Steve,

My understanding is that the affidavit should mention the portions to be withheld, if the entire document is not to be withheld (see 10 CFR 2.390(b)). I will use the affidavit you submitted and approve the request in part with exception of some portions if the application. For future submittals, please identify the portions that you are seeking to be withheld, which will be beneficial.

Thanks and have a safe trip,  
Norma

Norma,  
I'm traveling today and out of the office tomorrow. I will call you on Monday to discuss this. We've never listed individual sections of documents that are proprietary in an affidavit. Instead, we mark those parts that are proprietary accordingly, giving the reason that it is proprietary in the margin. I think this is consistent with 10CFR2.390. Perhaps we've always done it wrong, but even Westinghouse does it this way.

Good morning Steve,

I am working on preparing the proprietary determination for the Model No. MIDUS. The affidavit submitted with the application specifies that EnergySolutions is requesting to withhold the entire application (SAR, Revision 3). Nevertheless, the only portions in the application marked as "Security-Related Information" or "Proprietary..." are the following:

Licensing Drawings

TYC01-1601  
TYC01-1602  
TYC01-1603  
TYC01-1604  
TYC01-1605  
TYC01-1606  
TYC01-1607

TYC01-1608  
TYC01-1609  
Report...Radiolitic Gas Formation...  
Report...Hydrogen Generation...

I understand that you also submitted a public version of the application. In order to issue that proprietary determination, I want to consider the information you are asking (per the affidavit) to be withheld. I will appreciate if you submit an affidavit stating the information (specific portions of the application, drawings with the appropriate identification numbers, etc.) that you are seeking to be withheld at your earliest convenience.

Thanks in advance for your understanding (I also left a message in your voicemail).
