METROPOLIS WORKS

NRC License Performance Review Comments

Honeywell

Plant Status & Updates

- John Albritton – Plant Manager
 - About me
 - Top Priorities
- Plant Status
 - Plant continues to operate safely
 - NRC inspections – routine inspections ongoing
 - NRC License renewal effort in progress due 2017
- Continuing customer visits
 - Working to retain and expand customer base
 - Some movement in Japan on restart of Nuclear Reactors

Looking Forward

- Continue focus on work process improvements
 - **HOS – Honeywell Operating System**
 - Accountability to drive Zero Accidents, Zero Injuries, Zero Excursions
- Extended Annual Shutdown scheduled for late 2016 (90 days)
 - Process improvements and preventative maintenance
 - Installation of Capital Projects
- Honeywell supports the NRC inspections and evaluates all of their input and observations to improve the safety performance of the site. We appreciate their dedication and professionalism.
