Subject: MF7280 - Supplemental Draft RAI Regarding the Proposed FitzPatrick Administrative Technical Specification Amendment for Staffing and Training Upon Permanent Reactor Shutdown

**SUPPLEMENTAL DRAFT REQUEST FOR ADDITIONAL INFORMATION
REGARDING PROPOSED CHANGES TO TECHNICAL SPECIFICATION
ADMINISTRATIVE CONTROLS FOR STAFFING AND TRAINING UPON
PERMANENT CESSATION OF OPERATION**

**JAMES A. FITZPATRICK NUCLEAR POWER PLANT
ENTERGY NUCLEAR OPERATIONS, INC
DOCKET NO. 50-333
RENEWED FACILITY OPERATING LICENSE NO. DPR-59**

By letter dated January 15, 2016 (ADAMS Accession Number ML16015A456; CAC MF7280), Entergy Nuclear Operations (ENO) submitted a License Amendment Request (LAR) for the James A. FitzPatrick Nuclear Power Plant (JAF) Technical Specifications (TS). On March 16, 2016, ENO certified, pursuant to 10 CFR 50.82(a)(1)(i), that JAF would be permanently shut down on January 27, 2017 (ADAMS Accession Number ML16076A391). Once certifications for permanent cessation of operation and permanent removal of fuel from the reactor are submitted to the NRC, certain TS administrative controls may no longer be applicable. Therefore, ENO is requesting approval of changes to the staffing and training requirements in Section 5.0, Administrative Controls, of the JAF TSs that ENO considers appropriate for a permanently shutdown reactor and consistent with the defueled TSs of other decommissioning power reactors.

On April 14, 2016, the staff issued a draft request for additional information (RAI) (ADAMS No. ML16109A256) on Entergy's proposed JAF technical specification changes to administrative controls for staffing and training upon permanent cessation of operation (MF7280).

The NRC staff has determined that additional information is needed based on review by the technical specification branch.

This request for additional information (RAI) is identified as draft at this time to confirm your understanding of the RAIs and of the information needed to complete our evaluation. If the request for information is understood, please respond to this RAI within 30 days of the date of this request. Note that this RAI has been numbered to sequentially follow the previous RAIs issued on April 14, 2014.

Please call me at 301-415-2046 if you would like to set up a conference call to clarify the request for information.

Respectfully,

Bill Huffman
Project Manager
NRR/DORL/LPL4-2
U.S. Nuclear Regulatory Commission

*

RAI-5 Please review TS Section 1.1, Definitions, for inclusion of term “CERTIFIED FUEL HANDLER.”
