Subject: [External_Sender] NBSR PSP amendment request

As you may or may not be aware, NIST is currently undertaking a review of the NIST-wide security program and is considering some changes. As this could impact the NBSR Physical Security Plan, associated changes to the NBSR PSP may be necessary. As these changes could overlap PSP changes currently under consideration, we would like to withdraw our NBSR security license amendment request, dated December 7, 2015. We may, upon further consideration of the above mentioned changes, resubmit this or a similar amendment request in the future.

Please let me know if you have any questions.

Sincerely,

Rob
