Richard P. McIntyre, Acting Chief
Quality Assurance Vendor Inspection Branch-2
Division of Construction Inspection
and Operational Programs
Office of New Reactors

Ref: NRC Inspection Report No. 999010542016-201, Extension Request

Dear Mr. McIntyre,

ASCO has assembled a team to review the subject inspection report and prepare a thorough response within the time allowed. However, the report we received via e-mail from Sunhee Muhlbock-Victoria is dated April 15. For your reference, I have attached a copy of the e-mail receipt showing that ASCO received the report five days after the issue date on April 20.

We respectfully request an extension of five days to allow us the full 30 days to respond. This extension would move the due date for response from the original date of May 15 to May 20. Thank you in advance for your consideration of this request. We appreciate any allowance you can provide on our behalf and look forward to your decision.

Sincerely,

Michael Lenio
Director of Quality Assurance
ASCO Valve, Inc.
