

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
REGION II
245 PEACHTREE CENTER AVENUE NE, SUITE 1200
ATLANTA, GEORGIA 30303-1257

May 13, 2016

Richard Michael Glover
Site Vice President
H. B. Robinson Steam Electric Plant
Duke Energy
3581 West Entrance Road, RNPA01
Hartsville, SC 29550

**SUBJECT: H. B. ROBINSON STEAM ELECTRIC PLANT – INVESTIGATIVE SUMMARY,
OFFICE OF INVESTIGATIONS CASE NUMBER 2-2016-022F**

Dear Mr. Glover:

The Nuclear Regulatory Commission (NRC) Office of Investigations has closed the subject case regarding post-maintenance testing of the motor-driven auxiliary feedwater system at H. B. Robinson Steam Electric Plant.

The NRC determined that there was no information to indicate that management refused to collect relevant data so that the site would not have to enter a 24-hour limiting condition for operation action statement if the proposed test revealed a common cause. We plan no further action with regard to this specific matter. However, a finding was documented in Inspection Report 05000261/2016001, regarding the event related to this matter. Should you have any questions concerning this letter, please contact us.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

George T. Hopper, Chief
Reactor Projects Branch 4
Division of Reactor Projects

Docket No.: 50-261
License No.: DPR-23
