REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

MAY 10 2016

Scott R. Larkins
Radiation Safety Officer
Ford Motor Company
Research & Innovation Center
2101 Village Road
MD 1049
Dearborn, MI 48121

Dear Mr. Larkins:

Enclosed is Amendment No. 02 to your U.S. Nuclear Regulatory Commission (NRC) Material License No. 21-35113-01 in accordance with your request. Please also note that, in accordance with NRC policy, we have added the NRC's Agencywide Documents Access and Management System (ADAMS) accession number to the application identified previously in License Condition No. 16.

Changes made to your license are printed in **bold** font. Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

As a result of the enclosed license amendment reducing possession limits to levels below those requiring decommissioning financial assurance (DFA), previously submitted DFA is no longer required. Accordingly, we will return any cancelled instruments for your records, under separate cover.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions regarding the cancelled DFA, please contact my colleague Jennifer Bishop at (630) 829-9607.

Sincerely,

A handwritten signature in black ink that reads "Sara A. Forster". The signature is written in a cursive, flowing style.

Sara A. Forster, M.S.
