ENERGY, INC.'S ENVIRONMENTAL REPORT RELATED TO THE ROSS
LICENSE AMENDMENT FOR THE KENDRICK EXPANSION AREA

Dear Mr. Griffin:

The U.S. Nuclear Regulatory Commission (NRC) staff has determined that additional information is required in order to complete its environmental review of Strata Energy Inc.'s (Strata) license amendment request to expand its Ross uranium recovery project to include the Kendrick expansion area. Enclosed are the NRC staff's Requests for Additional Information (RAIs) that identify the information needed for the continued environmental review.

The NRC's environmental review schedule is based on Strata providing complete RAI responses within 60 days. If Strata will not be able to respond to the RAIs within 60 days, please let the NRC staff know when responses can be expected. However, if responses are not received within 60 days, there will be an impact to the environmental review schedule.
