Subject: RE: MAGS-A6 and A4 LCO 3.1.1 Changes

Wren, I understand now the intent of the following from the December 11, 2015, application to the NRC –

“addition, NAC requests the current disconnect between Amendments 4 and 5 be consolidated in Amendment 6. Specifically, the Amendment 4 changes to LCO 3.1.1 which were not incorporated into Amendment 5 due to administrative reasons.”

The statement is clarifying that LCO changes approved in Amendment 4, and included in the (now) Amendment 7 are to also be included in Amendment No. 6. Since the starting basis of Amendment 6 is Amendment No. 4, that already includes the revised LCO 3.1.1. In effect, this is a reminder to the NRC to ensure that this change is incorporated into the A6 TS. Please call me on my cell if you have any questions.

Subject: [External_Sender] MAGS-A6 and A4 LCO 3.1.1 Changes

John,

As we discussed on the phone, the changes requested in Amd. 4 were not included in Amd. 5 because of the timing of approval of the two amendments and the Zion exemption requested to use Amd. 4 changes prior to the rule being effective. At the time, NAC understood this situation and proceeded forward under the impression that during our next amendment (i.e., Amd. 6) the NRC would include the Amd. 4 changes to LCO 3.1.1 into Amd. 6 in order to correct this discontinuity.

Furthermore, the SER for Amd. 5 makes it clear that Amd. 5 changes are based on Amd. 3 because Amd. 4 was not effective at the time (i.e., page 2 of the SER). In other words, Amd. 5 did not remove the changes made in Amd. 4. As we requested, please include the Amd. 4 changes into Amd. 6 so this discontinuity can be reconciled.

Thanks!
