

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

MAY 19 2016

Samer Salka, M.D.
Radiation Safety Officer
Premier Cardiovascular Specialists
15120 Michigan Avenue
Suite A
Dearborn, MI 48184

Dear Dr. Salka:

Enclosed is Amendment No. 7 to your NRC Material License No. 21-32740-01 in accordance with your request. Note that we have also removed Condition No. 13 as it generally does not apply to activities authorized under your license. We have noted that, in your March 2, 2016 letter, as modified in your May 16, 2016, letter, you confirmed that all residual licensed material has been removed from the 7300 Canton Center Road location of use, such that any remaining residual radioactivity is within the limits of 10 CFR Part 20, Subpart E, and is ALARA.

Based on its review, the staff has concluded that all licensable radioactive material has been removed from your facilities located at the 7300 Canton Center Road location of use, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for your facilities located at 7300 Canton Center Road, Canton, Michigan. Your facilities at that location are suitable for unrestricted use.

Changes made to your license are printed in **bold** font. Please review the enclosed license amendment document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9892 so that we may provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Enclosure 1 to this letter contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

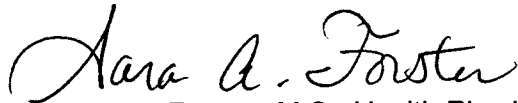

S. Salka

- 2 -

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

In accordance with Title 10 CFR 2.390, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS, which is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S., Health Physicist
Materials Licensing Branch
Division of Nuclear Materials Safety
