Anthony,

Thank you for your review. Approximately 328 acres would be permanently converted within the

CRN Site, including the entire 240-acre area previously disturbed during the CRBRP. An additional approximately 140 acres within the CRN Site would be temporarily converted as a result of construction activities, mostly to the northeast of the main plant site. Within the offsite Barge/Traffic area approximately 30 acres would be permanently converted (of which approximately 12.1 acres have been previously disturbed) and an additional 15 acres would be temporarily converted. Overall, the entire 935 acres of the CRN site would be unavailable for use as farmland because the site would be restricted access. Much of the Barge/Traffic Area is DOE property that already has restricted access. Attached is a new Figure 4 that shows the permanently and temporarily cleared areas. The GIS files for these are also included for download in the link below. If you need additional information please let me know and we will be happy to assist.

This file will be available for download until 10/21/2015

Roberta:

I received your request for Farmland Protection Policy Act (FPPA) review of the Clinch River Reactor project and I need to get a little more information that was not in the documentation that I had forwarded to me. On the enclosed AD-1006, you have listed that the entire 1131 acres will be converted and I wanted to make sure this was correct or is the area that was manipulated in 1983-1984 the area that will be impacted by the overall project (240 acres).

Thanks for your help.
Anthony
