

5/25/2016

To the U.S. Nuclear Regulatory Commission,

As of April 18, 2006 I have acquired all assets belonging to Andrews Material Testing Services, Inc. Including 3 Troxler 3400 series moisture density gauges. I'm also currently the Radiation Safety Officer for Andrews Material Testing Services. By purchasing these gauges, I commit to abide by all constraints, conditions, requirements, representations, and commitments identified in the current license. Furthermore, I'd also like to request an amendment to materials license number 21-26172-01, from "Possession and Storage with intent to dispose" to "Active" so I can resume conducting materials testing with the density gauges. I currently have clients requesting density tests on construction materials starting towards the end of next week. If any further information or documentation is required, please let me know.

Mr. Tran,

Attached is a formal letter for the request of amending the materials license. If you need any further information or documentation, pleas let me know.
