The NRC staff currently updates the Commission on the progress of materials licensees in addressing safety culture through an annual Commissioners' Assistants (CA) note. Although the preparation of a CA note does not typically require a significant amount of resources and the March 22, 2016, CA note was only the second such update to the Commission on this topic, I approve the staff's request to sunset the requirement for an annual CA note. In lieu of an annual CA note, the NRC staff should report on the status of materials licensee efforts to address safety culture during public Commission meetings on the appropriate business line.
