Subject: Acceptance of Licensing Submittal - LAR 15-05, "Tier 1 Editorial and Consistency Changes" for V.C. Summer Units 2&3

Ms. Rice,

By letter dated May 12, 2016, the South Carolina Electric & Gas Company, on behalf of itself and the South Carolina Public Service Authority, submitted a license amendment request and exemption request for the V.C. Summer Nuclear Station, Units 2 and 3. The purpose of this e-mail is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of the subject. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

The review will be charged to code RQ0472.

If you have any questions, please contact me.

Billy
William (Billy) Gleaves
Lead Project Manager for
V.C. Summer Units 2 and 3
Licensing Branch 4
US NRC, Office of New Reactors
