SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-35090-01

By letter dated April 8, 2016, the licensee requested the U.S. Nuclear Regulatory Commission (NRC) to transfer all licensed material and authorized locations of use from NRC radioactive materials license 42-35090-01 to NRC radioactive materials license 17-29308-01, and then proceed with termination of license 42-35090-01.

Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material and all locations of use can be transferred to NRC radioactive materials license 17-29308-01. No further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 06 to License No. 42-35090-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(14)(vi).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

Roberto J. Torres, M.S., Senior Health Physicist  
Nuclear Materials Safety Branch B
